

CLIENT DEPLOYMENT SERVICES

The deployment of new client devices should be an exciting time for any organisation, however the reality is often very different with a range of requirements to cater for.

These include: arranging delivery, storage, software builds, packaging disposal, installation to desk, managing downtime, organising the disposal of the legacy equipment to list just a few.

Academia offers a flexible client deployment service that can be tailored to best meet the needs of your organisation, offering a hassle free client roll out.

RANGE OF BENEFITS TO YOUR ORGANISATION

- Free up staff resources.
- Simplify the deployment process.
- No storage headaches - new and legacy equipment.
- Fast deployment with minimal downtime.
- Legacy equipment removed from site as part of the deployment process.
- All packaging removed from site.
- Asset register provided, containing serial number, asset tag and device specification.
- Installation can be called off in batches from storage.
- Compliance with environmental and data standards.
- Reduced acquisition costs through the resale of legacy assets.
