

# Academia's Jamf Parachute Pack

Academia's Jamf Parachute Pack allows you to quickly and efficiently convert your existing Jamf Pro configuration to allow remote deployment and configuration of your Apple Devices.

## This comprises of:

- A remote deployment readiness assessment
- Configuration assistance to allow effective remote deployment
- Optional one month of support

These grant a state of play as to where the estate is at currently, what needs to be done to enable zero-touch and remote deployment, help making required configuration changes and support to pick up any snagging issues that may arise.

## Throughout the readiness assessment and subsequent configuration assistance, we cover the following areas:

- Ensuring the Jamf Pro Server can be accessed from the outside world (in the case of on-premise Jamf Pro)
- User account handling – Active Directory vs. Azure Active Directory vs. Local Accounts
- Remote distribution point access
- Application deployment strategy to reduce initial install load
- Application deployment strategy to enable streamlining licence deployment (particularly Adobe & Office 365)
- Remote connectivity deployment (e.g. VPN)
- Remote access to devices for Technical Support
- Compliance considerations for remote devices
- Device enrolment process configuration to ensure a smooth deployment

## Pricing from:

£1,500 - Readiness Assessment and Configuration Assistance

£2,500 - Readiness Assessment, Configuration Assistance and 1 Month of Support

## Additional Services:

£425 - Jamf Connect Setup for Azure Active Directory Use

From £1,600 per annum - Dedicated UK Cloud-based Distribution Point

**Contact the team to discuss further via 01992 703900 or [info@academia.co.uk](mailto:info@academia.co.uk)**

This service is supplied under the following assumptions:

- An existing Jamf Pro server is configured to deploy devices on-premise
- Any network amendment requirements can be met (specifications will be provided)
- Subscription-based licensing is employed for Office 365
- An Apple School Manager account has been created and configured
- One month's support mechanism assumes a single point of contact (customer's Jamf Administrator or IT Support desk) for support requests
